

ROMAN™

Mortar Mix Type S

TYPE S MORTAR MIX is a quality blend of fine masons sand, portland cement and lime. It is used to build brick, stone and block walls, and can be used as a stucco scratch and base coat. Roman Mortar Mix is also used to tuckpoint mortar joints. Roman Mortar Mix is designed to exceed the specifications of ASTM C 387 and C 270 for Type S Mortar/Stucco.

COMPRESSIVE STRENGTH:

28 day 1,800 psi (12 MPa) Water Retention 75%

MIXING:

One 80 lb. (36.4 kg) bag will require up to 4 quarts (3.7 L) of water. Thoroughly mix the contents of the bag with the water, adding the a little at a time if the mix is too stiff. *Adding too much water will weaken the mix and may cause cracking in the surface.*

FINISHING:

Butter the ends of the brick or block with the mortar and place into a bed of mortar. Level while gently tapping into place. When used in tuckpointing, after compaction into the joint, allow the fresh mortar to set before striking with a jointer tool.

CURING:

Keep the placed material damp in hot weather conditions to aid curing. Protect the mortar from freezing for at least 24 hours after placement.

COVERAGE:

One 80 lb. (36.4 kg) bag will lay about 44 standard brick or 16 – 8 inch concrete block.
One 80 lb. (36.4 kg) will cover about 72 sq. ft. at 1/8 inch thick.

ITEM/ UPC:

02033/ 8-99002-00203-3

Revised 11.10.09

SAFETY:

Before using this product, read the Material Safety Data Sheet (MSDS).

WARNING:

Wear protective clothing and equipment as needed. Read specific warnings on the package for inhalation, eye and skin contact. **KEEP OUT OF REACH OF CHILDREN.**
